

**On the Nature of Heaven and the Importance Lucifer played in humanity's Free will.**

**The speed of light is finite, nothing moves faster. At that speed there would be no visible light, because any light traveling towards your optic nerves would never catch up to you. Everything would stay in /perfect/ harmony relative to everything else.**

**When Lucifer decided to descend to the Earth he had to move slower than that speed, thus becoming the "bearer" of light itself. Or, the one who made the light visible to the universe. He broke the rule of heaven, which resides /within/ light speed itself.**

**That is why I hypothesize that lucifer and Christ are one. Christ is the light. The all. And lucifer is the Bearer of the light, The Morning Star.**

**(Note that Revelations 22:16 Jesus says: I am the root and the offspring of David, and the bright and Morning Star)**

**There can be no one without the other. A duality which brings balance to the universe.**

**Heaven is perpetually Motionless, if it is comprised of light, I suppose it would be both motion and motionless at the same time, it would be everything, but either way everything would remain static relative to everything else. If Heaven is within the speed of light then nothing could move. Ill get to why this is important later.**

**That's how God intended this world to be. Unchanging. Perfect in harmony. The Garden of Eden was supposed to be perfect, so everything would initially grow and, on maturity, stay in stasis and remain perfect without dying.**

**Lucifer convinced Man to open its eyes to the truth of the world. He bestowed free will upon us. Otherwise we would have, likewise in Gods image, grown to be perfect in stasis.**

**So, everything that we do and see in life, in this reality, is because of Lucifer.**

**Everything that you know and feel and touch and see is because of Lucifer.**

**Otherwise everything would be in static stasis. Nothing**

would grow old.Nothing would move. Nothing would die.
